Objective: Front-end Developer

Technologies: Java Script/ Html/ Css/ React JS/ React Native/Node JS/Nodemon/Axios/Git/ Git Hub/Insomnia/Styled Components/Typescript/Docker/React Native...

Professional summary: Experience in Front-end and Back-end also, Knowledge in, HTML, CSS, REACT JS, framework as my library, Code versioning using Git, Github. Consumption of Api's using AXIOS.

My previous experiences were essential for my professional and personal development, having a good relationship with co-workers and clientes. Completely open to constructive criticism, responsibility and corporate mentality. Working as a team is my focus for exchanging knowledge and learning.

Professional Experience:

Freelance projects: development of freelance projects, code maintenance, development of landing pages, mobile applications using the react native framework.

Period: 02-2023 to specific projects.

Company: Cedro têxtil spinning and fabric company,

City: Sete Lagoas MG

Period: 05-02-2019 to specific projects.

Position: Automation technician

Main activities: Development of ladder programming language for PLC programmable logic controller, maintenance of electrical circuits, Reading and interpretation of electrical diagrams,

Parametrization of frequency inverters, development of HMI programming siemens, altus, unitronics models, maintenance and equipment installations measuring industrial instrumentation.

Courses and certificates:

Course: Systems analysis and development.

Institution: Faculty Pitágoras Unopar.

About: Algorithms and structure programming, analysis of developments oriented objects, systems analysis and modeling, mobile development, software engineering, structured programming language, object-oriented language, database programming and development.

Period: 02/2023 at 02/2025.

Course: DevClub Full Stack-Pro

Institution: DevClub

About: Course focused on front-end and back-end development, presents essential content for a developer's career. In addition to having an excellent Community and Always willing to help and increase knowledge or make great networks.

Course modules:

- Mindset (2 modules)
- How to use VsCode
- HTML
- CSS (4 modules)
- Git e Github
- JavaScript (4 modules)
- How to get your first job.
- NodeJS
- ReactJS (2 modules)
- NPM e Yarn
- Styled-Components
- API REST
- SCRUM
- SQL
- MongoDB
- Docker
- MVC
- E-commerce from a hamburger.

Period: 02/2023 at 02/2024.

Course: Industrial automation technician

Institution: Senai Zerrenner Sete Lagoas MG

About: programming plc's logic controllers, using the ladder programming language, development of hmi programming (human machine interface), Inverter parametrization, configuration and maintenance in industrial instrumentation measurement systems.

Period: 02-2020 at 03-2022

Course: Electrical technician

Institution: Municipal technical school of Sete Lagoas MG.

About: Development and interpretation residential, commercial and industrial electrical projects, execution, supervision, inspection and maintenance control in electrical power systems and electronic maintenance services.

Period: 02-2026 at 12-2018
